SPEEDY CLEAN Waterless Car Wash ***Professional Strength • Ready-to-Use*** ***Spray and Wipe • No Rinsing • No Water Needed***

Bradley's **SPEEDY CLEAN Waterless Car Wash** can be used for spot cleaning or full cleaning of vehicle exteriors. Where water use is restricted or not available this product will get your vehicle clean. Cleans rain spots, dirt and road film without the use of harmful solvents. Use as a spot cleaner or for full vehicle.

Safe for use on glass, plastic, painted surfaces, chrome, aluminum, and vinyl. Product may also be used on hard surfaces of the car's interior.

DIRECTIONS FOR USE:

For light to moderately dirty vehicles: Work from the top of the vehicle, progressing downward. Work on one section of the car at a time. Spray ample amount of product on the surface to be cleaned, wetting area thoroughly, but not enough to create excess runoff. Do not let product dry on the surface before wiping off. Always use a clean microfiber cloth to wipe the damp surface to remove the dirt and grime. Then flip the cloth to the dry side and wipe the remaining moisture to enhance the shine and prevent spotting.

For extra dirty surfaces: Repeat the process a second time for best results.

For best results:

- Start with the windows, before doing other surfaces. This will prevent spreading dirt to the glass and causing streaks.
- As one microfiber towel begins to show dirt build-up, switch to another clean towel to continue wiping. This will help prevent scratching and spreading dirt to other areas.
- Do not use in direct sunlight which will cause product to dry too quickly.
